www.murdeduke.com.au

Welcome to our second Murdeduke Matrons sale. We are excited to offer a selection of joined R heifers, all the cows that calved in September and October and 9 embryo packages. Leading the mature cow section of the draft are 15 donor cows who have been catalogued to ensure the quality of the females being offered is of the highest standard. The calves at foot will be parent verified and have their genomic enhanced EBV's established.

2020/21 has been a busy for us, fantastic seasonal conditions, booming commodity prices and of course Covid 19. Our year has been highlighted by two events; the sale of a half share in Murdeduke Quarterback Q11 for a then Australian record price (\$60,000) for a yearling Angus bull and secondly the success of our first Murdeduke Matrons sale which saw Murdeduke K304 (Quarterbacks grand dam) sell for \$28,000 to a syndicate of three studs which included Merridale, Vic, Crawford Angus, NSW and Little Meadows, WA.

Murdeduke Barunah K304

Quarterback is a Momentous son, who has an exceptional EBV package with 9 traits in the top 2% of the breed, great structure and phenotype. Although he is a heifers calf he still managed to be one of the heaviest and "pick" bulls of the drop. His strength comes from the engine room of herd the Barunah family which features CSWK304 and CSWU25 two of our very best performed matrons.

Murdeduke Quarterback Q011

Last years cow sale saw a complete clearance ,with females being sold to four states. As hard as it was, we sold some of our most highly credentialed cows Murdeduke Panda D40, Murdeduke Jedda E175 (dam of renowned ABS high fertility sire Murdeduke Kicking) and Murdeduke Barunah K304 (the grand dam of boom sire Murdeduke Quarterback Q11 and dam of Sterita Park stud sire Murdeduke Knighttrider). They have been the backbone of our herd for a number of years and came with the highest recommendation.

Like last year we are selling some of our most highly prized cows. Murdeduke Jedda L123 (a cow with exceptional phenotype and carcase data to kill for IMF 4.2%), Murdeduke Jedda H200 (another high carcase merit cow IMF 4.9% who boasts a flushing record that averages 14 transferable embryos per flush) and 3 flush sisters M83, M87 and M128 of the cow that made \$46,500 at the Ashfield dispersal Murdeduke Jedda M93. Murdeduke Jedda M83 is the dam of Murdeduke Jedda Q 293 who also sold at the Ashfield dispersal for \$55,500. These Jedda cows certainly have the runs on the board, they are moderate framed, easy doing, fertile they come with our highest recommendation.

We have been building toward our female sales for a number of years. The introduction of a number of high quality Stud Sires, coupled with good calvings, has seen us increase the selection pressure on the herd. Basically only the top third of the female drop finds their way into the stud. The resulting genetic improvement can be seen in the added depth and consistency not only our bull sale teams but also the quality of the females we have been offering for sale. This improvement has been not only in our own herd, as seen by us winning the RASV Reserve Champion Pen of Heifers during Beef Week 2017 and making the finals in 2019 and 2020 but by the success of our clients. RG Allen and Sons at Mortlake won the prestigious Grand Champion Pen of five Steers at the NSW Beef Spectacular in 2020 after also winning in 2017.

In a quest to maintain our momentum we are pleased to report the purchase of three stud bulls recently. Te Mania Pheasantry P1479, a super high marbling and EMA bull, Pathfinder Phat Cat, a well muscled, thick topped sire and Rennylea Prospect P550, a Rennylea L519 son offering calving ease, doing ability and phenotype. Prospect and Phat Cat having been signed by Agri-gene, while Murdeduke Kicking signed with ABS and Coonamble Nic Nat signed with Agrigene gives us four semen sires to use in our herd as backup bulls ensuring rapid genetic gain.

Stud Sire Coonamble Nic Nat N439

The Stud herd is run in conjunction with extensive prime lamb and cropping enterprises. A free range piggery, which is the home to the branded pork brand Otway Pork, can also be found at Murdeduke.

Competition between the enterprises ensures that commercial drivers help determine our breeding principles.

MURDEDUKE'S BREEDING OBJECTIVES

Our breeding objectives are designed to provide genetics that deliver efficient, easy calving cows and calves that stack weight on quickly and make processors grin when they see the quality of them.

“The unseen bonus our genetics provide is an ability to improve carcass performance and fertility without sacrificing type.”

In our quest to supply superior animals we not only collect all required breed plan data and have our cattle independently structurally assessed but we ensure that nutrition is not compromised in our moderate rainfall environment. We manage nutrition and rumen function for optimal performance so our cattle express their potential over time without compromising joint and bone development which can be the case with short term sale preparations.

To unlock the potential of Murdeduke's quality assurance program we encourage producers to also adopt cutting edge animal nutrition and management techniques. Early rumen development and appropriate animal health measures ensure calves maximize their performance on farm and hit the ground running.

Our Breeding Objectives Deliver at Beef 2021

Beef 2021 saw our breeding objectives deliver on the big stage. Gippsland client, Barry Hollond won three sections of the carcass competition firstly at the preliminary state level and then at Beef Australia 2021's national level including the Meat Standards Australia's national Award for the Highest Indexing Carcass.

Barry Holland and Lachie Wilson celebrating Barry's Beef 2021 win.

The national MSA Index Award for the highest indexing carcass was hotly contested competition with some 3.5 million carcasses graded, with Mr Hollonds Angus steer carcass coming out on top. To top it off the steer was grass finished.

Barry also won two state classes with Murdeduke blood steers in the pasture fed pen of three dressed steers 260 to 340 kilograms and 300 to 420 kg export chiller classes. These entries placed 5th and 6th respectively nationally.

Barry joins growing list of Murdeduke clients achieving success in carcass competitions around the country.

MURDEDUKE'S CLIENT SERVICES

Murdeduke is situated 1.5 hours South West of Melbourne just off the Princes Highway at Winchelsea. Our client base stretches from the SE of South Australia to East Gippsland to as far north as Rockhampton in Queensland.

We hold an annual bull sales in March (Winchelsea) and August (Rockhampton) and have a large selection bulls for private selection in the spring. Semen for both commercial and stud purposes is freely available from our leading sires.

Bloodlines featured in the herd over the next few years include Millah Murrah Paratrooper, Murdeduke sires Hussar and Kicking, Rennylea L519, Beast Mode, Varilek Geddes, 38 Special and Millah Murrah Quixote. Bulls used to ensure calving ease is maintained in the herd include, our newly acquired stud sire Te Mania Pheasantry, Sitz Stella, Rennylea Prospect, Coonamble Nic Nat, Landfall New Ground and Chiltern Park Moe.

The most exciting news we have is the introduction of Murdeduke Quarterback and Millah Murrah Rembrandt and Rocket Man into our breeding program. Quarterback, Rembrandt and Rocket Man epitomize the modern Angus providing calving ease, growth, fertility and great carcass merit.

Murdeduke has a J Bas score of 8. To maintain this status we have undertaken a risk assessment and put into place a cleaning and disinfecting protocol at the Colac Regional Saleyards the sale venue.

TACE 
TransTasman Angus Cattle Evaluation

PRE-SALE INSPECTION

We encourage you to contact us to arrange a paddock inspection prior to sale day. The cattle will be trucked to Colac the day prior to the sale and will be available for inspection from mid afternoon on the Sunday 12th December at the saleyards. **Photos available online from early december. See Elite Livestock**

METHOD OF SELLING

The cattle will be run through the ring at the Colac Regional Saleyards and will be sold at auction under Victorian auction conditions. The auction will be simulcast live allowing for online bidding . Elite Livestock will provide the online platform.

COVID SAFE

Victorian Government COVID-19 rules will apply, attendee's will be required to conform to them. Hand sanitiser will be readily available, masks will be required, as will social distancing.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA
SV : the sire has been verified by DNA
DV : the dam has been verified by DNA
: DNA verification has not been conducted
E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

PREGNACY STATUS

All the females were AI'd on the 22nd November with backup bulls introduced on the 29th November. Te Mania Pheasantry and Murdeduke Black Pearl P82 were introduced as the backup bulls. ***Unfortunately the time frame won't allow for the females to be preg tested.***

HEALTH

The Murdeduke herd has a John's score of J-Bas 8. The females have undergone a full 7 in 1 vaccination program although we recommend booster shots on an annual basis. The calves have had an initial 7 in 1 vaccination. All animals are HGP free and have not been fed Animal By-products.

The females have had their genetic disorder status identified. Lot 21 CSWQ493 is NH25%. We are hopeful that we will have her status confirmed by sale day. The R heifers and cows have been scanned for BVDV with no PI's being identified in the team.

DNA TESTING

The calves at foot will have genomics and parent verified conducted. The possible sires include Te Mania Pheasantry, Pathfinder Phat Cat, Coonamble Nic Nat, Murdeduke M196, Murdeduke N80, Murdeduke P33 and P36 Murdeduke P82 and Murdeduke Q bulls Q13, Q64, Q74, Q121, Q267.

HEALTH AND SAFETY

Under normal circumstances our cattle are placid and quiet however care must be taken when inspecting the cattle as crowd pressure can alter their behavior. Please don't crowd the cattle and ask for assistance if you would like a closer inspection. Visitors enter the cattle pens at their own risk. No Children are allowed in the pens. **Covid Precaution. Remember to Social Distance**

SELLING AGENTS

Ray White GTSM , Charles Stewart, Elders and Nutrien will conduct this year's sale. The auction will be simulcast live with bidding accepted through the Elite Livestock viewing platform.

A rebate of 2% is allowed to agents nominating and accompanying buyers to the sale. **Nominations must be made by 4pm the day prior to the sale, with settlement being made within seven days to be eligible for the rebate.**

Notes: Quarterback is certainly hitting his straps. He is easy to use both on paper and in the paddock, he provides good calving ease, plenty of growth and outstanding carcase data. These traits coupled with wonderful structure and impressive phenotype are helping him build a rock solid reputation.

Notes: Paratrooper needs no introduction. Whilst R38 and R48 have recently stolen the limelight, the weight of success Paratrooper is chalking up with outstanding progeny reports, his own development as a bull plus his breeding versatility make him the go to bull in the breed at the moment. It has been suggested he will displace Emperor as the most widely used bull in the breed.

Notes: The Pheasantry story continues to grow. It was a Pheasantry heifer calf that captured buyers interest at the recent Ashfield dispersal and pushed her lot to \$55,500. Calving ease, structure combined with big EMA and IMF EBVs make P1479 very appealing.

Notes: Phat Cat offers a unique blend of outcross pedigree, phenotype and data. He has plenty of natural thickness, with a meat filled top line and 7 traits in the top 1% of the breed including all indexes. A smokey, we are just waiting to see him deliver the goods - strong, productive, data packed progeny.

Notes: 4 IVF embryos. This joining teams up Millah Murrah Loch Up and Millah Murrah Quixote and a strong donor line which features D345 the cow on the front cover of the catalogue. The progeny will feature docility, a great birth to 600 day spread, plenty of milk and good fertility EBVs. With inherited structural soundness most boxes are ticked setting up the foundations of an exciting new generation of animal.

DISCLAIMER AND PRIVACY INFORMATION

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Embryo Expected Average Progeny Values

Expected average progeny values are provided to assist breeders estimate the outcome of particular mating combinations. The actual EBVs for any individual progeny resulting from a particular mating are likely to vary from the expected average values.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA.

SV : the sire has been verified by DNA.

DV : the dam has been verified by DNA.

: DNA verification has not been conducted.

E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

BUYERS OPTION TO OPT OUT OF DISCLOSING PERSONAL INFORMATION TO ANGUS AUSTRALIA

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following ids.....

from member.....(name) do not consent to Angus Australia using my name, address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Name: Signature:

Date:

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350.

If you have any questions or queries regarding any of the above, please contact Angus Australia on (02) 6773 4600 or email office@angusaustralia.com.au

HOW TO REGISTER with

ELITE LIVESTOCK AUCTIONS

Simply go to **www.elitelivestockauctions.com.au** using your desktop, laptop, iPad, iPhone or android device.

Click on the **"Sign Up"** page / link

Create a bidding profile using the bidder registration page.

(You can either register as a livestock agent, company or private buyer)

Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue

Click **"Register"**

You will then be notified by email that an account has been created.

Once an account has been created you are all **"Set to Bid"**

Each Auction can then be viewed by clicking **"Live Auction"** logo on the Elite Livestock Auctions website.

Once you receive email notification that your account has been created please go to the sale you wish to bid at and click **"Request to Bid"**

The sale will then approve your application to bid and on the sale catalogue you will see **"✓Bid Request Approved"**

On Sale day simply login, click **"Enter Auction"** on the catalogue page and you can start bidding.
(There is no need for software download)

At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

UNDERSTANDING THE TRANSTASMAN ANGUS CATTLE EVALUATION (TACE)

What is the TransTasman Angus Cattle Evaluation?

The TransTasman Angus Cattle Evaluation is the genetic evaluation program adopted by Angus Australia for Angus and Angus influenced beef cattle. The TransTasman Angus Cattle Evaluation uses Best Linear Unbiased Prediction (BLUP) technology to produce Estimated Breeding Values (EBVs) of recorded cattle for a range of important production traits (e.g. weight, carcase, fertility).

The TransTasman Angus Cattle Evaluation is an international genetic evaluation and includes pedigree, performance and genomic information from the Angus Australia and Angus New Zealand databases, along with selected information from the American and Canadian Angus Associations.

The TransTasman Angus Cattle Evaluation utilises a range of genetic evaluation software, including the internationally recognised BLUPF90 family of programs, and BREEDPLAN® beef genetic evaluation analytical software, as developed by the Animal Genetics and Breeding Unit (AGBU), a joint institute of NSW Agriculture and the University of New England, and Meat and Livestock Australia Limited (MLA).

What is an EBV?

An animal's breeding value can be defined as its genetic merit for each trait. While it is not possible to determine an animal's true breeding value, it is possible to estimate it. These estimates of an animal's true breeding value are called EBVs (Estimated Breeding Values).

EBVs are expressed as the difference between an individual animal's genetics and a historical genetic level (i.e. group of animals) within the TACE genetic evaluation, and are reported in the units in which the measurements are taken.

Using EBVs to Compare the Genetics of Two Animals

TACE EBVs can be used to estimate the expected difference in the genetics of two animals, with the expected difference equating to half the difference in the EBVs of the animals, all other things being equal (e.g. they are joined to the same animal/s).

For example, a bull with a 200 Day Growth EBV of +60 would be expected to produce progeny that are, on average, 10 kg heavier at 200 days of age than a bull with a 200 Day Growth EBV of +40 kg (i.e. 20 kg difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Or similarly, a bull with an IMF EBV of +3.0 would be expected to produce progeny with on average, 1% more intramuscular fat in a 400 kg carcase than a bull with a IMF EBV of +1.0 (i.e. 2% difference between the sire's EBVs, then halved as the sire only contributes half the genetics).

Using EBVs to Benchmark an Animal's Genetics with the Breed

EBVs can also be used to benchmark an animal's genetics relative to the genetics of other Angus or Angus infused animals in Australia.

To benchmark an animal's genetics relative to other Angus animals, an animal's EBV can be compared to the EBV reference tables, which provide:

- the breed average EBV
- the percentile bands table

The current breed average EBV is listed on the bottom of each page in this publication, while the current EBV reference tables are included at the end of these introductory notes. For easy reference, the percentile band in which an animal's EBV ranks is also published in association with the EBV.

Considering Accuracy

An accuracy value is published with each EBV, and is usually displayed as a percentage value immediately below the EBV.

The accuracy value provides an indication of the reliability of the EBV in estimating the animal's genetics (or true breeding value), and is an indication of the amount of information that has been used in the calculation of the EBV.

EBVs with accuracy values below 50% should be considered as preliminary or of low accuracy, 50-74% as of medium accuracy, 75-90% of medium to high accuracy, and 90% or greater as high accuracy.

Description of TACE EBVs

EBVs are calculated for a range of traits within TACE, covering calving ease, growth, fertility, maternal performance, carcase merit, feed efficiency and structural soundness. A description of each EBV included in this publication is provided on the following page.

UNDERSTANDING ESTIMATED BREEDING VALUES (EBVS)

Birth	CEDir	%	Genetic differences in the ability of a sire's calves to be born unassisted from 2 year old heifers.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	CEDtrs	%	Genetic differences in the ability of a sire's daughters to calve unassisted at 2 years of age.	Higher EBVs indicate fewer calving difficulties in 2 year old heifers.
	GL	days	Genetic differences between animals in the length of time from the date of conception to the birth of the calf.	Lower EBVs indicate shorter gestation length.
	BW	kg	Genetic differences between animals in calf weight at birth.	Lower EBVs indicate lighter birth weight.
Growth	200 Day	kg	Genetic differences between animals in live weight at 200 days of age due to genetics for growth.	Higher EBVs indicate heavier live weight.
	400 Day	kg	Genetic differences between animals in live weight at 400 days of age.	Higher EBVs indicate heavier live weight.
	600 Day	kg	Genetic differences between animals in live weight at 600 days of age.	Higher EBVs indicate heavier live weight.
	MCW	kg	Genetic differences between animals in live weight of cows at 5 years of age.	Higher EBVs indicate heavier mature weight.
	Milk	kg	Genetic differences between animals in live weight at 200 days of age due to the maternal contribution of its dam.	Higher EBVs indicate heavier live weight.
Fertility	DtC	days	Genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving.	Lower EBVs indicate shorter time to calving.
	SS	cm	Genetic differences between animals in scrotal circumference at 400 days of age.	Higher EBVs indicate larger scrotal circumference.
Carcase	CWT	kg	Genetic differences between animals in hot standard carcase weight at 750 days of age.	Higher EBVs indicate heavier carcase weight.
	EMA	cm ²	Genetic differences between animals in eye muscle area at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate larger eye muscle area.
	Rib Fat	mm	Genetic differences between animals in fat depth at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more fat.
	P8 Fat	mm	Genetic differences between animals in fat depth at the P8 rump site in a 400 kg carcase.	Higher EBVs indicate more fat.
	RBY	%	Genetic differences between animals in boned out saleable meat from a 400 kg carcase.	Higher EBVs indicate higher yield.
	IMF	%	Genetic differences between animals in intramuscular fat (marbling) at the 12/13th rib site in a 400 kg carcase.	Higher EBVs indicate more intramuscular fat.
Other	NFI-F	kg/day	Genetic differences between animals in feed intake at a standard weight and rate of weight gain when animals are in a feedlot finishing phase.	Lower EBVs indicate more feed efficiency.
	Doc	%	Genetic differences between animals in temperament.	Higher EBVs indicate better temperament.
Structure	Foot Angle	score	Genetic differences in foot angle (strength of pastern, depth of heel).	Lower EBVs indicate more desirable foot angle.
	Claw Set	score	Genetic differences in claw set structure (shape and evenness of claws).	Lower EBVs indicate more desirable claw structure.
Selection Index	ABI	\$	Genetic differences between animals in net profitability per cow joined in a typical commercial self replacing herd using Angus bulls. This selection index is not specific to a particular production system or market end-point, but identifies animals that will improve overall profitability in the majority of commercial grass and grain finishing beef production systems.	Higher selection index values indicate greater profitability.
	DOM	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic supermarket trade.	Higher selection index values indicate greater profitability.
	HGRN	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture grown steers with a 250 day feedlot finishing period for the grain fed high quality, highly marbled markets.	Higher selection index values indicate greater profitability.
	HGRS	\$	Genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting pasture finished steers.	Higher selection index values indicate greater profitability.

A series of horizontal dotted lines for writing notes.
